

One market. Many allocations.

THE PROBLEM

21.6%

of EU road-freight vehicle-km
run empty

~50%

average urban freight
vehicle load factor

21 major European cities

Empty return

THE PROBLEM

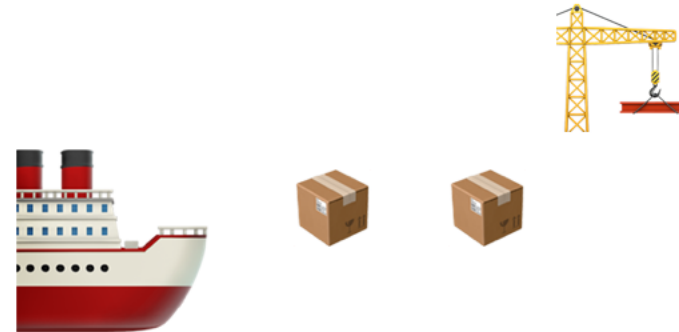

\$15–20B /year

spent repositioning empty containers

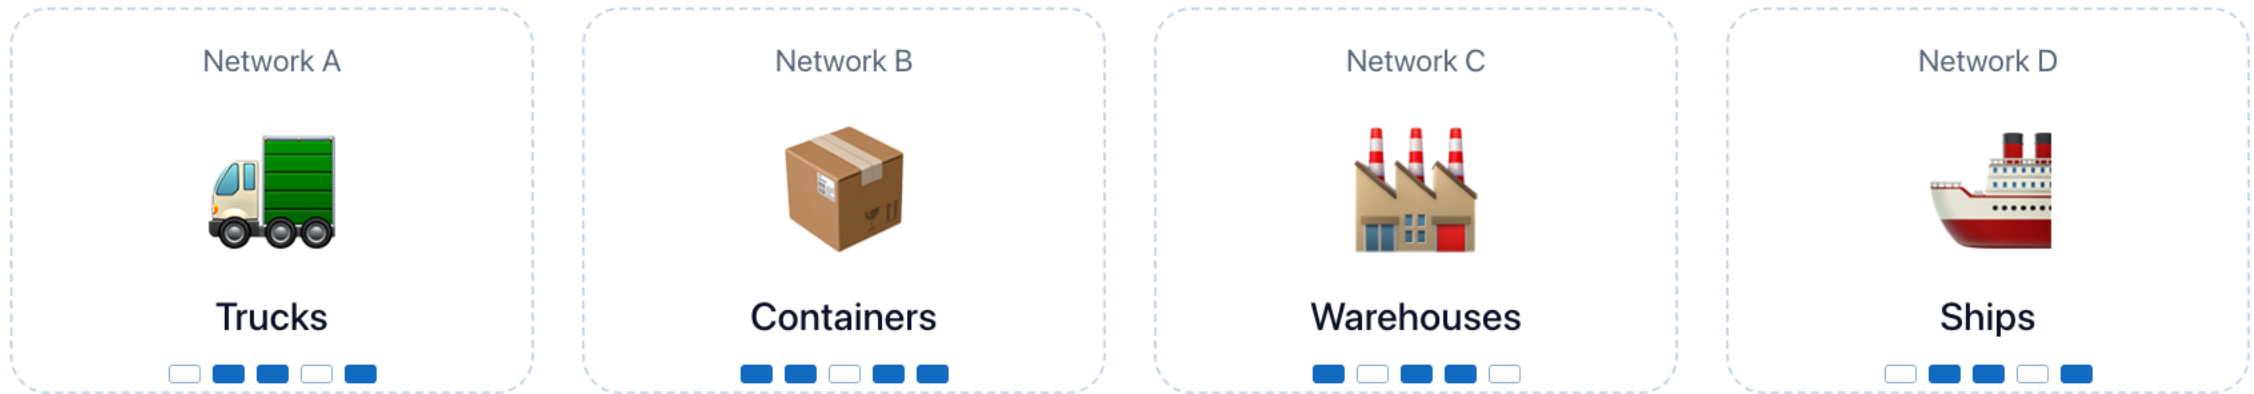

Surplus port

Containers needed

THE PROBLEM

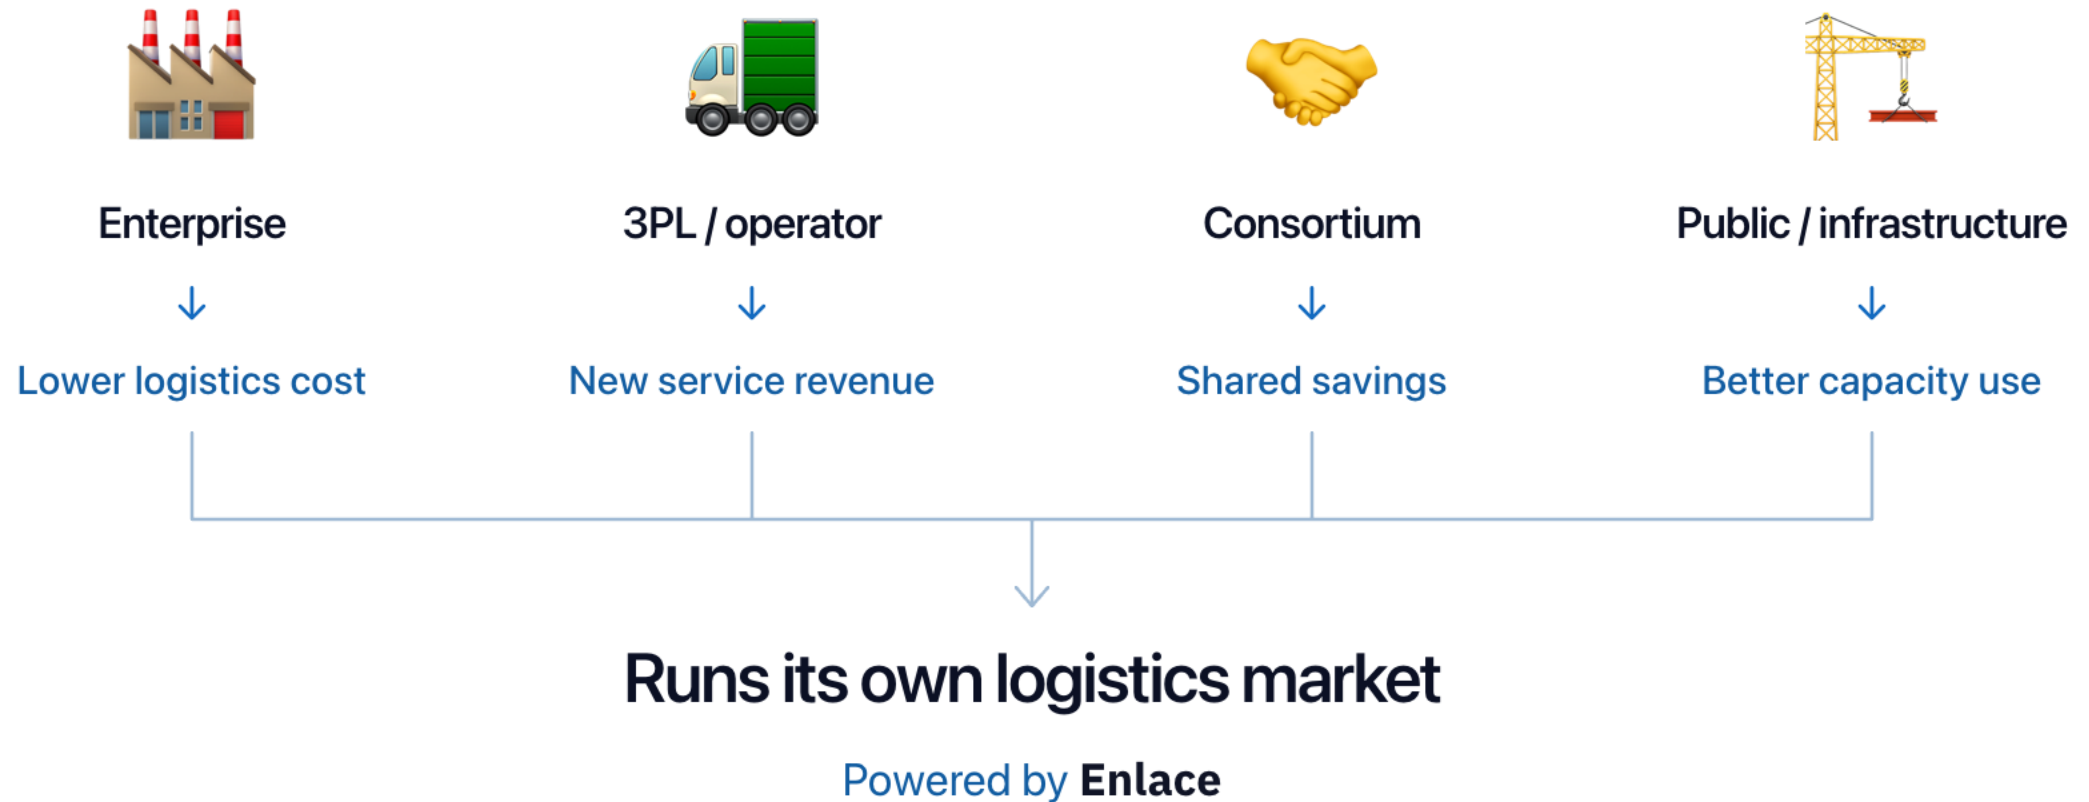

The resources exist.
There is no mechanism to coordinate them across organizations.

Enlace clears the market.

Allocation + prices + terms ✓

Who pays for Enlace and why?

Who controls each network?

A market operator's control surface

	Amazon Flex	Uber Freight	Transporeon	Enlace
Core purpose	Amazon deliveries	Freight management	Transport management	Logistics exchanges
Procurement	No	Yes	Yes	Yes
Multi-shipper sharing	No	Yes	Unconfirmed	Yes
Participation control	Amazon	Uber Freight	Shipper	Network owner
Rule definition	Amazon	Shipper + platform	Shipper + platform	Network owner
Orchestrator	Amazon	Uber Freight	Shipper	Customer
Own exchange network	No	No	Partial	Yes
Resources		 		

Enlace gives the network owner control over participation, rules and the exchange mechanism.

Start with 2–3 shippers and their carriers.

AGREED

Design partner

Agreed to start working together.

NOW

2–3 shippers

- Start with compatible freight lanes.
- Their existing carriers.
- Test exchanges across shared lanes.

THEN

Expand the market

More clients.
More lanes.
More participants.
More resource types.
New markets.

An annual platform fee per private logistics market.

€200k+

Initial annual platform fee per private logistics market

+ deployment / integration

Participants

Resources

Fee scales with participants and resource types

Transport is the starting point.

≈\$12.29T

Global logistics costs
